

MPOB Codes of Good Agricultural Practice for Oil Palm Estates and Smallholdings

Dr. Chan Kook Weng Hj. Wahid Omar

MPOB View of Sustainability

Sustainability is all about the long-term security of our supply chain if the palm oil business is to continue with brand values and consumer trust

Sustainability & Codes of Practice

The Technical Barriers to Trade (WTO 1994) demands that the development of sustainability standards must agree with the Codes of Good Practice for preparation, adoption and application of standards

Assess Sustainability

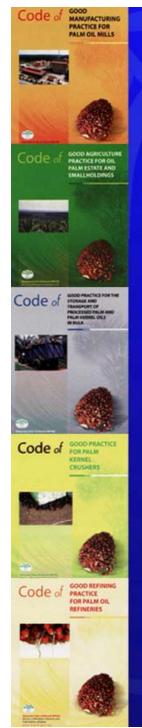

Structure	Definition	Example
Objective	Aim of initiative	Assure sustainability
Principles	Fulfillment of objective	Positive GHG balance
Criteria	Satisfy rules of a principle	GHG emissions reduce by 30%
Indicators	Measure attribute to fulfill criterion	Carbon intensity (CO ₂ e/MJ fuel)
Verifiers	Dataset site-specific to indicator	IPCC GWP of palm oil

Objective, Scope & Definition

CoP	Requirements
Objective	Ensure sustainable palm oil meets requirements of food safety, quality, environmental protection, biodiversity enhancement and GHG reduction
Scope	Assure production of quality palm oil from processed fresh fruit bunches suitable for safe consumption and utilization
Definitions	12

Sustainability Principles

Issue	Principle
4.1. Traceability	To know where all raw materials come from
4.2. Records & Audit	To know what lies behind the value of palm oil
4.3. Planting Material	To ensure palm oil come from sustainable source
4.4. Site History	To make positive contribution to production site
4.5. Soil Management	To minimize adverse effects in soil
4.6. Fertilizer Management	To optimize balance fertilizer usage with yield
4.7. Irrigation & Fertigation	To minimize adverse effects on water

GOOD MANUFACTURING PRACTICE FOR PALM OIL MILLS Code of GOOD AGRICULTUR PRACTICE FOR OIL FALM ESTATE AND SMALLHOLDINGS Code of Code of GOOD PRACTICE Code of

Sustainability Principles

Issue	Principle
4.8. Crop Protection	To apply IPM to reduce use of pesticides
4.9. Harvesting	To ensure optimum yield and quality oil in FFB
4.10. Post Harvest	To reduce loss and add value
4.11. By-Products	To avoid, reduce wastage and pollution
4.12. Health, Safety and Welfare	To promote safe and good working conditions and improve workers' wellbeing
4.13. Environmental	To minimize adverse effects on air through emission and to conserve wildlife, biodiversity and HCV areas
4.14. Record of complaints	To ensure remedial actions are undertaken
5. Legality	To respect all applicable laws of Malaysia and agreements of which country is signatory

Criteria	Indicators
4.1. Traceability Traceable produce	Evidence of FFB from estates and smallholdings
4.2 Record keeping 4.2.1. Record keeping 4.2.2. Internal audit	Evidence of updated and accessible records Evidence of annual audit and corrective actions
4.3.Planting materials 4.3.1. Choice 4.3.2. GMO 4.3.3. GMO planting 4.3.4. OPNCC nursery 4.3.5. Clonal material 4.3.6. Protected variety 4.3.7. Disease resistant 4.3.8. Seed treatment	Evidence of compliance to MS 157 Not planted, if planted, permission needed Evidence of agreement on planting Records of planting materials Evidence from vendors with pedigreed material Respect intellectual property Evidence of reduced use of pesticides Evidence of justified treatments carried out

Criteria	Indicators
4.4.1 Site history 4.4.1.1. Record history 4.4.1.2 New planting 4.4.1.3 NP <300m 4.4.1.4 NP <25° slope 4.4.1.5 Difficult soils	Evidence of layout of fields and crop history Record of risk assessment done competently Evidence of non-cultivation at such height Evidence of non-cultivation of such slope Avoidance of extensive planting on such soils
4.4.2 Site management 4.4.2.1 Legal rights 4.4.2 .2 Conserve soils 4.4.2.3 Identify fields	Evidence of land ownership Evidence of prevention and control of erosion Record of system of field numbering
4.5 Soil Management 4.5.1 Soil type map 4.5.1.1 Soil map 4.5.1.2Topography map	Evidence of soil map with soil types Use soil map to assist planning

Criteria	Indicators
4.5.2 Cultivation	Evidence of proven cultivation practices
4.5.3. Erosion and runoff 4.5.3.1 Mechanization 4.5.3.2 Soil moisture	Evidence of adoption of proven techniques Evidence of use of appropriate machinery Evidence of soil moisture techniques adopted
4.6. Fertilizer Management 4.6.1 Nutrient management 4.6.1.1 Nutrient balance 4.6.2.1 Fertilizer usage 4.6.2.2 Fertilizer Application	Evidence of nutrient balance and crop yield Evidence of science-based recommendation Data on maximize benefits and minimize loss

Criteria	Indicators
4.6.3. Application record	Evidence of location, date, type, method and name of operator
4.6.4. Application machinery	Evidence of maintenance of machines
4.6.5. Fertilizer Source and storage 4.6.5.1. Fertilizer stock 4.6.5.2. Chemicals 4.6.5.3. Fertilizer store 4.6.5.4. Nursery stock 4.6.5.5. Fresh produce 4.6.5.6. Hazard and risk 4.6.5.7. Content of source	Record of stock updated for inspection Records of separate fertilizer and pesticide Evidence of covered, clean and dry store Records separate from fertilizer Record s separate from fertilizer Such areas be clearly indicated Record of source and chemical content

Criteria	Indicators
4.6.6 Organic fertilizer 4.6.6.1 Organic fertilizer handling 4.6.6.2 Human and pig wastes	Evidence of storage and handling to minimize risk of contamination Prohibition of use irrespective of untreated or treated
4.6.6.3 Heavy metals 4.6.6.4 Integration 4.6.6.5 Organic sources	Evidence of analysis prior to application Record of organic and inorganic programme Record of types of organic sources applied
4.7 Irrigation and fertigation 4.7.1 Planning	Evidence of recommendation by expert
4.7.2 Method 4.7.2.1 Efficient method 4.7.2.2 Optimize usage 4.7.2.3 Record usage	Record of best water and nutrient usage Evidence of water management plan Records of irrigation or fertigation available

Criteria	Indicators
4.7.3 Quality of water 4.7.3.1 Sewage water 4.7.3.2 Water analysis	Prohibited for use Record of analysis done annually
4.7.4. Supply of water 4.7.4.1 Tidal water	Evidence of water from sustainable source Consultation of agriculturist and authority
4.7.5. Water harvesting	Evidence of water harvesting practices

Criteria	Indicators
4.8. Crop protection 4.8.1. Basic elements 4.8.1.1. Use of pesticides 4.8.1.2. Apply IPM 4.8.1.3. Seek advice	Minimize pesticidal use in crop protection Evidence of use of IPM Record of consultation with IPM expert
4.8.2. Choice of agrochemicals 4.8.2.1. Appropriate agrochemicals 4.8.2.2. Officially registered 4.8.2.3. Selective products 4.8.2.4. Instruction 4.8.2.5. Correct dosage 4.8.2.6. Banned chemicals 4.8.2.7. Consult customers	Record of agrochemical use Per Act 149 (Pesticides) and Act 281 (Food) Minimal impact: environment & biodiversity As per label for effective application Prevent buildup of resistance Prohibited to use Determine additional restriction
4.8.3. Advice on pesticides usage	Evidence of consultation with expert

GOOD MANUFACTURING PRACTICE FOR PALM OIL MILLS Code of GOOD AGRICULTUR PRACTICE FOR OIL FALM ESTATE AND SMALLHOLDINGS Code of Code of GOOD PRACTICE Code of

Criteria	Indicators
4.8.4. Records of application	Details of records of pesticide, dosage, method and name of operator required
4.8.5. Safety, training and instructions	Decords of an arctory trained on onto use
4.8.5.1. Training 4.8.5.2. Field marking	Records of operators trained on safe use Evidence of marking of sprayed fields
4.8.6. Personal clothing and equipment 4.8.6.1. Suitable clothing 4.8.6.2. Cleaning	Evidence of protective clothing per Act 514 Record of cleaning after use
4.8.7. Pre-harvest interval	Should adhere to as per pesticide label
4.8.8. Spray equipment 4.8.8.1. Suitable equipment 4.8.8.2. Correct dosage	In good working condition and calibrated Treatment type calculated and prepared

GOOD MANUFACTURING PRACTICE FOR PALM OIL MILLS Code of GOOD AGRICULTUR PRACTICE FOR OIL FALM ESTATE AND SMALLHOLDINGS Code of Code of GOOD PRACTICE Code of

Criteria	Indicators
4.8.9. Disposal of surplus spray mix	Details of records of pesticide, dosage, method and name of operator required
4.8.10. Pesticide storage 4.8.10.1. Store regulation 4.8.10.2. Security of store	Evidence on: Store according to local regulation Store secured, water resistant, ventilated
4.8.10.3. Shelves 4.8.10.4. Retain spillage 4.8.10.5. Mixing facilities 4.8.10.6. Emergency	Use non-absorbent material Prevent spillage to waterways Correct measuring and mixing equipment Facilities to deal with emergency
4.8.10.7. Keys and access 4.8.10.8. Procedures 4.8.10.9. Inventory 4.8.10.10. Packaging	Limited to trained personnel Handling accidents with telephone numbers List available for inspection Stored in original packaging
4.8.10.11. Registered 4.8.10.12. Powder vs liquid 4.8.10.13. Warning signs	Only registered pesticides be stored Powder placed above liquid pesticides Placed on access doors

Criteria	Indicators
4.8.11 Empty containers 4.8.11.1 Disposal of empties 4.8.11.2 Disposal system 4.8.11.3 Rinsing empties 4.8.11.4 Pierced empties 4.8.11.5 Empties secured 4.8.11.6 Disposal regulation	Reduce contamination of environment Should be used when available Rinse 3 times and washings returned Prevent re-use Until disposal As per pesticide Act 149 (1974)
4.8.12 Obsolete Pesticides	Evidence of obsolete pesticides disposed through approved waste contractor

Criteria	Indicators
4.9. Harvesting 4.9.1. Hygiene 4.9.1.1. Prevent deterioration 4.9.1.2. Food safety training 4.9.1.3. Toilet and washing	Prevent contamination Evidence of training in basic hygiene Evidence of clean toilet /washing facilities
4.9.2. FFB harvesting and collection 4.9.2.1. Ripeness standard 4.9.2.2. Zero unripe tolerance 4.9.2.3. Bunch stalks cut 4.9.2.4. Pruned frond 4.9.2.5. Loose fruit collection 4.9.2.6. Prompt delivery 4.9.2.7. Harvesting rounds	Evidence of using industry standards Records of rejection of unripe bunches Evidence of stalks cut within 5 cm Evidence of designated frond stacking Loose fruit collected without contamination Evidence of delivery within 24 hours Records of rounds at 10-15 days intervals

Criteria	Indicators
4.10. Post-harvest handling 4.10.1. Logistics 4.10.1.1. Conveyance 4.10.1.2. Infield collection 4.10.1.3. Intermediate hopper	Evidence on: Minimum delay/damage/contamination Minimum delay/damage/contamination No shoveling to prevent bruising
4.11. By-products, waste and pollution management 4.11.1. Identify waste 4.11.2. Operational plan 4.11.3. Dumping of waste	Evidence of identified waste at sites Records of usage of by-products Evidence of non-dumping of by-products
4.12. Worker health, safety and welfare 4.12.1. Action plan	Evidence of an action plan for inspection

	Criteria	Indicators
	4.12.2. Training 4.12.2.1. Provision 4.12.2.2. Record of training 4.12.2.3. Procedures	For dangerous & sophisticated equipment Kept for individual worker Display and explanation of clear instruction in appropriate language
The second secon	4.12.3 Facilities and equipment4.12.3.1. First aid boxes4.12.3.2. Hazards signage	At designated places with personnel i/c Appropriate warning signs displayed
	4.12.4. Pesticide handling Health checks for workers handling pesticides	Per OSHA Act 514 (1994) and Pesticide Act 149 (1974)

Criteria	Indicators
4.12.5 Hygiene 4.12.5.1 Packing and storage sites 4.12.5.2 Training 4.12.5.3 Clean building	Have adequate pest control measures Evidence of training programme Record of regular inspection for pests
4.12.6 Welfare 4.12.6.1 Comply regulations 4.12.6.2 On-site quarters	Record of employment conditions If provided be habitable and comply Workers' Minimum Standards Housing and Amenities Act 446 (1990)

Criteria	Indicators
4.13. Environmental Issues 4.13.1. Impact on Environment Concern for air, water, soil and other environmental issues	Comply with Environmental Quality Act 127 (1974)
4.13.2. Wildlife & Biodiversity 4.13.2.1. Conserve biodiversity 4.13.2.2. EIA	Enhance biodiversity, wildlife and HCV Evidence of action plan for habitat and biodiversity enhancement
4.13.3. Unproductive sites Conversion of unproductive site to conservation areas	Evidence of swamps, steep slopes, deep peat converted
5. Legal requirements Comply to Malaysian Laws	Malaysian laws and international agreements Malaysia is signatory
